

Finreon World Equity Multi Premia® Defensive (Pension)

31/01/2025

Strategy

Finreon World Equity Multi Premia® Defensive is composed of approximately 1'000 of the largest equities from developed markets worldwide excluding Switzerland. The approach combines risk reduction of a minimum variance portfolio with return optimization through systematic factor exposure. Finreon World Equity Multi Premia® Defensive exhibits the attractive risk characteristics of a minimum variance solution, albeit with a more attractive return profile. While reducing the variance of the portfolio, the approach allows through investment in different long-only strategies to harvest not only the market beta and low risk factor, but also six other empirically proven, long term return sources (so called factor premia): Value, Size, Momentum, Residual Momentum, Reversal and Quality.

The strategy follows a quantitative approach. The return and risk can deviate from the Global Equities ex CH Index (the "benchmark"). The total risk born by the investor is similar to an unhedged global equity investment in foreign currency.

Current month

In January, the World Equity Multi Premia® Defensive strategy achieved a return of 3.7% and thereby outperformed the Global Equities ex CH Benchmark, which achieved 3.4%.

The factors Value (4.0%), Momentum (4.4%), Residual Momentum (4.7%) and Reversal (4.0%) outperformed the benchmark.

	World EMP® Defensive	Global Equities ex CH ¹⁾	Global Equities ex CH MinVol ¹⁾
Return current month	3.7%	3.4%	3.7%
Return year-to-date	3.7%	3.4%	3.7%

	Value	Size	Momentum	Residual Momentum	Reversal	Low Risk	Quality
Return current month	4.0%	2.7%	4.4%	4.7%	4.0%	3.2%	3.0%
Return year-to-date	4.0%	2.7%	4.4%	4.7%	4.0%	3.2%	3.0%

Multi Premia® Defensive concept

- Traditional minimum variance approaches focus only on risk reduction without optimizing return
- Furthermore, traditional minimum variance approaches exhibit a relatively high risk – in addition to the market beta, only one factor premium, low risk, is harvested implicitly
- Finreon World Equity Multi Premia® Defensive combines a minimum variance portfolio with a broad diversified and maximal factor exposure through factor diversification
- The solution consists of seven minimum variance portfolios which are optimized with regard to factor exposure. Besides the market beta and the low risk factor premium, six additional factor premia are harvested systematically: value, size, momentum, residual momentum, reversal and quality
- Through diversification across different factor premia, the relative risk is reduced
- The solution is a suitable substitute for a passive MinVar solution – while having an attractive risk-return-profile, the drawdowns are substantially reduced

Performance Finreon World Equity Multi Premia® Defensive: Finreon World Equity Multi Premia® Defensive Fund Class D since 10/2016.

1) The Global Equities ex CH serves as primary benchmark, the Global Equities ex CH MinVol serves as secondary benchmark. Until 09/2016, total returns are reported, since 10/2016 net returns are reported. 2) Average negative (downside volatility) or positive (upside volatility) deviation of returns from zero.

3) Reference value is the benchmark. 4) Correlation for periods when benchmark shows negative (downside) resp. positive (upside) returns.
